

A guide to logging in and using Hegarty Maths

- 1) Go to www.Hegartymaths.com

- 2) Click on Student log in and enter, school, first name, surname and date of birth
- 3) Enter password
- 4) Click on my tasks and complete the required ones by the due date

Every pupil will be set homework on Hegarty maths according to their ability. This homework is set on a Tuesday and is due the following Tuesday. Pupils should complete the homework as soon as possible so they have time, if needed, to see their teacher for more help/support. Any password issues should be notified to the teacher as soon as possible in order for the homework to be completed before the due date.

This will consist of watching the video and making some notes from this. Copying one or two examples would be the best idea and any other notes needed.

Then, once the video has been watched completely, pupils should attempt the questions by writing each one down and doing the working out. Pupils should then input their answers until all the questions are complete. The number of questions varies, depending on the task.

The score should be recorded at the end and a minimum pass rate is set according to the class. If this is not reached the pupil should attempt the task again.

Sanctions are not used if a pupil has watched the full video and has spent at least 20 minutes on the task. Sanctions are given if a pupil has not watched the video and spent a minimal amount of time on the task that result in an unsatisfactory score.

If a pupil has forgotten their password, then they should enter the details on the first page and click the link on the second page that says 'forgotten password – click here'. The password will then be reset by a member of staff as soon as possible.
